## **Re: Infusion of Capital against a Cash Backed BY AXIO COIN**

Thank you very much for taking the time to learn more about our innovative Government Debt Obligation platform, Municipal Network Exchange, Inc (AXIO). As discussed and requested, please find below highlights of our offering as well as our current needs and capabilities.

### **Key Information:**

- **Total Market:** Our universe of available debt is 360B annually
- **Technology/Platform:** We have developed a revolutionary software which automates the entire lending life cycle from the on-boarding of agencies seeking to sell their obligations, to purchasing the debt, perfecting the security interest and settlement once repayment has

occurred. It has taken us nearly 5 years to secure the relationships and approvals necessary to operate this business and we are currently the only firm with the ability to conduct these transactions.

- Return: We can consistently provide annual returns of 70% via the acquisition of federal obligations which have a similar risk to US Government Debt.
- Duration: The average duration of our loans is 35 days, with a minimum of 10 days and a maximum of 120 days.
- Portfolio Allocation: Given the relatively small amount lent to each provider, our portfolio has considerable diversification with most loans representing less than 1% of the portfolio.

Thus no one entity can materially affect performance.

- Current Needs: AXIO requires approximately 10MM USD to finalize its software and platform development to become operational. Up to an additional 350MM is required to purchase the obligations from agencies. AXIO can scale to accommodate investments up to 3B+ AUM within 12 months.

On behalf of the entire AXIO team, I would like to thank you for your interest in our proprietary platform.

*AXIO Team*
